## **Acknowledgement to Country**

AlburyCity acknowledges the Wiradjuri people as the traditional custodians of the land in which we live and work and we pay our respects to Elders past, present and future for they hold the memories, culture, tradition and hopes of Aboriginal and Torres Strait Islander people that contribute to our community.

## **Our Vision**

To build a community that values diversity and recognises that having a disability is not a limiting factor if we facilitate an environment that offers equity of opportunity.

## **Our Aim**

For AlburyCity to be a leader in offering an inclusive and accessible community for people to live, work and play.

## **CEO and Mayor's Message**

We are delighted to present AlburyCity's second Disability Inclusion Action Plan (DIAP) 2022 - 2026.

AlburyCity prides itself on being a city where all people can enjoy everything that our city has to offer. We celebrate our diverse communities and acknowledge people with disability as valuable members that live, work, and visit our region.

Council formalised its commitment to reducing and eliminating barriers to inclusion in our city through our first DIAP in 2017. We have come a long way and many initiatives are now embedded in the core business of our organisation; however, we acknowledge that there is still a way to go to offer a truly accessible and inclusive city.

This four-year plan provides a range of practical actions we can take to be more inclusive through programming, education, events, access to information and infrastructure improvements.

We would like to acknowledge the contributions of the Albury Access Committee whose members help AlburyCity to identify barriers to access and inclusion and provide advice on practical and innovative solutions. Continued involvement by the Access Committee will be critical to creating a more inclusive and accessible community for everyone.

Thank you to everyone involved in providing feedback to develop this plan, particularly those with lived experience of disability. Your feedback has been the cornerstone in the development of this DIAP and we look forward to hearing about the difference the delivery of these actions makes in your lives.

## A Snapshot

Inclusion is everyone's business. A disability may be acquired at birth or result from an accident, injury, or disease. It may be visible, such as a loss of limb, or invisible such as a psycho-social disability, but any one of us can develop a disability at any time so it is in everyone's interest to be as inclusive and accessible as we can.

The social model of disability, outlined in the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD), of which Australia is a signatory, states that people with disability are not disabled by their impairment but by the barriers in the community that prevent them gaining equal access to information, services, transport, housing, education, training, employment, and social opportunities.

The social model helps us recognise barriers that make life harder for disabled people and it is the responsibility of the whole community to remove these barriers so that people with disability can fully participate in community life and exercise more independence, choice, and control.

AlburyCity recognises that people are disabled by barriers in society, not by their impairment or difference. Barriers can be physical, like buildings not having accessible toilets, or they can be caused by people's attitudes to difference, like assuming disabled people can't do certain things. We are committed to doing everything we can to eliminate these barriers and promote genuine inclusion in Albury.

This four-year plan identifies the specific actions that we can take to contribute to the delivery of the NSW Disability Inclusion Plan (DIP) and is built around four key themes:

- Positive community attitudes and behaviours
- Creating liveable communities
- Supporting access to meaningful employment
- Improving access to mainstream services through better systems and processes

## Our Community

Albury is a modern, vibrant city on the northern banks of the Murray River in the Riverina region of south-eastern New South Wales. Located 300 kilometres north-east of Melbourne and 570 kilometres south-west of Sydney, the city covers 306 square kilometres and has a population of 51,722.

Based on current data:

- 17.7% of the population, or 1 in 6 people, have a disability.
- 5.7% of the population, or 1 in 17, have a severe or profound disability.

We are an ageing population. In 2016, people aged 65 years and over made up 15.7% of the population which is projected to increase to 21% by 2041. The prevalence of disability increases with age, with 50% of people aged 65 years and over having a disability, meaning that the prevalence of disability in our community is going to increase across the life of this Disability Inclusion Action Plan (DIAP).

**Did you know:** 90% of the 4.4 million people with disabilities in Australia are living with an invisible disability. You might have friends, family or colleagues living with disabilities that you don't know about!

## Legislation and Policy

The importance of access and inclusion is recognised through legislation and policy at all levels of Australian government. In conducting local government disability inclusion action planning it is important to consider the broader legislative and policy context to ensure we are all working efficiently toward a common goal.

In developing this DIAP, consideration has been given to the following documents:

International:

- United Nations Convention on the Rights of Persons with Disabilities (UN CRPD).

Federal Government:

- Australia's Disability Strategy 2021-2031
- National Disability Insurance Scheme Act 2013
- Disability Discrimination Act 1992
- Equal Opportunity Act 2010

NSW Government:

- NSW Disability Inclusion Act (DIA) 2014
- NSW Disability Inclusion Plan (DIP) 2021-2025

AlburyCity:

- Disability Inclusion Action Plan 2017 – 2021
- Equal Employment Opportunity Policy
- Albury 2030 Community Strategic Plan
- CBD Parking Strategy
- Public Toilet Policy
- Communications Plan
- Community Engagement Strategy
- Commercial Activities on Public Land Policy

## **We consulted**

We asked the community to help us to develop a DIAP that addresses the issues that are important to them. We put a call out to community members with a lived experience of disability, their carers and interested members of the community to share their feedback and ideas.

Our approach to consulting the community focused on the four themes identified in the NSW DIP:

- Positive community attitudes and behaviours
- Creating liveable communities
- Supporting access to meaningful employment
- Improving access to mainstream services through better systems and processes

Feedback was predominantly collected via a survey that was produced in online, hard copy and easy English formats to ensure that all community members had an opportunity to contribute.

Engagement opportunities were promoted via social media, network meetings, News from AlburyCity, public notices and direct contact with disability service providers, schools, and other key stakeholders.

The DIAP page on AlburyCity's Have Your Say platform was viewed 537 times. We received 109 survey responses, one written submission, met with CALD and ATSI community leaders and consulted with the Albury Access Committee.

Our survey results told us:

- Accessibility of AlburyCity-owned facilities and assets received an average rating of 3.36/5
- Footpaths (2.76/5) and public toilets (2.85/5) received the lowest ratings for accessibility
- More than half (51%) of respondents have felt discrimination against them or someone they care for because of their disability. The majority of these instances were felt out in the community (62%).
- 64% of respondents were not aware as to how they could provide feedback to AlburyCity in relation to access issues.
- 71% of respondents were not aware that AlburyCity has an Access Committee.

### **What you said an inclusive, accessible city offers you:**

"Opportunities to join in community events that are inclusive."

"Being able to participate in ALL activities."

"Improved disability toilets that provide adequate space and equipment for the person with disabilities and their support."

"Feeling of empowerment to be able to get about my daily business"

"A place where kids can get safe sensory seeking play"

"Diversity in people, places and opportunities"

"Education to promote Inclusive attitudes to minimise barriers, especially for those with less visible disabilities"

## Action Plan

We are excited to commit to the following actions over the duration of this DIAP. Our action plan is divided into four focus areas and identifies:

<b>ID</b>	Identification number
<b>Action</b>	What we are going to do.
<b>Responsible</b>	Which AlburyCity team(s) are responsible for leading the delivery of the action.
<b>Timeframe</b>	When implementation of the action will commence. Short = Year 1 Medium = Year 2-3 Long = Year 4+
<b>Frequency</b>	How often will we complete the action.
<b>Performance Indicators</b>	How we will know if we have achieved the action.

## 1. Positive Community Attitudes and Behaviours

The attitudes and behaviours of the general community towards people with disability can be the greatest barrier to full access and inclusion. Community attitudes can further be influenced by the intersection of the particular characteristics of a person with disability, such as gender, age, ethnicity, or the type of disability itself.

Aim: To build community awareness of the rights and capabilities of people with disability and support the development of positive attitudes and behaviours towards people with disability.

## 2. Creating Liveable Communities

Inclusiveness and accessibility for people with disability forms a crucial component of the assessment of the liveability of any community. NSW Government agencies and local councils will work to eliminate the barriers in the built environment, transport, housing and local supports that prevent people with disability from fully engaging with the opportunities that exist within their communities.

Aim: To increase participation of people with disability in all aspects of community life, through targeted approaches to address barriers in housing, learning, transport, health, social and cultural engagement and wellbeing.

### 3. Supporting Access to Meaningful Employment

Employment rates for people with disability are significantly lower than those without disability across all sectors. Participation in meaningful employment is vital if people with disability are to attain economic security, retain a sense of purpose and engage effectively with others in our society.

Aim: To increase the number of people with disability in meaningful employment, thereby enabling people with disability to plan for their future, exercise choice and control, and increase their economic security.

## 4. Improving Access to Mainstream Services Through Better Systems and Processes

A common issue for people with disability is the difficulty in navigating the systems and processes required to access the services and supports they need in the community. These difficulties are the product of a number of barriers including a lack of accessible information, inflexible processes, and limited opportunities for feedback and input.

Aim: To ensure that people with disability can make informed choices about available services and to easily and efficiently access mainstream government services and other opportunities in the community.

## **Monitoring, Evaluation and Reporting**

Throughout the life of this Plan, we will evaluate our progress and report on the implementation of actions in AlburyCity's Annual Report, a copy of which will be provided to the appropriate Minister.

We will provide annual updates to the Albury Access Committee on our progress and are committed to involving them in the delivery and review of our Action Plan.

In the final year of this plan, we will review our progress and consult with our community to review the DIAP and future actions. This allows us to consider and reflect the changing needs in our community.

We look forward to getting to work to build an inclusive community for our community.
